

1. Open OutlineCompare.xlsm
2. Click on Macros in the View tab in Excel
3. Select "ImportCSVs" and select Run

4. A dialogue box will open for you to select a folder. Select the folder of the version 11 cube you are testing in your compare and click OK.

5. The VBA script will import the CSVs in that folder. Then another dialogue box will open for you to select the version 9 cube. Click OK to select it.

6. The VBA script will finish running. Save the workbook with a new name.
